Technical drawings of two types of wooden floor joist connections.

Top Drawing (≤ 6 m): Shows a connection for a span length less than or equal to 6 m. It features three horizontal planks supported by vertical posts. The maximum height of the planks is 50 mm. The angle between the planks and the support is 90°. The horizontal spacing between the posts is 250 mm, and the spacing between the planks is 500 mm.

Bottom Drawing (> 6 m): Shows a connection for a span length greater than 6 m. It features three horizontal planks supported by vertical posts. The maximum height of the planks is 50 mm. The angle between the planks and the support is 90°. The horizontal spacing between the posts is 250 mm, and the spacing between the planks is 500 mm.

Detail View (Planks 45°): Shows a detail view of the planks at a 45° angle. The horizontal spacing between the posts is 150 mm, and the spacing between the planks is 300 mm. The maximum height of the planks is 50 mm.
